ANTHONY OLMO

Anthony Michael Olmo has been sailing off Fairfield County's Gold Coast since he was 3. An avid competitor, Anthony has been racing with the Breakwater Irregulars on Long Island Sound for 2 Seasons, sailing on a Ranger 33 sailboat, the champion for the past 3 years.

Not only does Anthony love nautical life, he enjoys the cosmos and deep space, designing futuristic steam-powered spaceships and weaponry on AutoCAD, top-rated software for drafting and designing. With this system, Anthony creates his designs and takes those concepts to levels of technical accuracy and photorealistic rendering, using high-quality controls to ensure precision of mechanical drafting, and on-screen simulations. He studies airplanes, battleships and weapons of war – old & new – such as melee and ranged alike.

One of his favorite classes at school was mechanical engineering and he even built his own PC computer from scratch. As a pastime, Anthony makes animations with Blender, a powerful 3D graphics software toolset used for films, visual effects and other interactive applications. He uses this system for simulation, rendering, and Minecraft animation.

Anthony would like to give special thanks to The Southport School, an academy that specializes in language-based learning difficulties. He started attending the institute in 6th grade after having endured years of reading and writing challenges from dyslexia and dysgraphia as well as suffering from dyscalculia and ADHD. His collaboration with Willow Wren, author of *The Healing*, made this endeavor a reality.

When he's not sailing or building computers, Anthony has fun attending the renowned New York Renaissance Faire. He lives with his mom and brother and his two hedgehogs, Charlie and Henry.

“You guys are so organized, you’ve got such a great plan, and there are great reviews of your book, The Dauntless Chronicles!” “I’m really, really looking forward to what lies ahead!”

News12, The Bronx, Connecticut, Hudson Valley

“Two local teens are celebrating the out-of-this-world success of their new novel! It’s now the #1 Bestseller and #1 Hot New Release on Amazon!”

Quotes from Interviews

WGCH 1490am, Center Stage with Pamela Kuhn

“Today I have with me two young people who have conceived and written a novel called The Dauntless Chronicles, and oh, I love it when I hear the word chronicles as we know there will be several sequels to follow. The novelists are Willow Wren and Anthony Olmo, two teenagers who are inspired by the imaginative world of space. And something tells me that they may have their eye on Hollywood as well!”

Pamela: “Writing a complete novel at your ages is impressive!” “You two are determined!”

Pamela: “You guys have a lot of power with what you’re doing right now. You know, wielding words is perhaps the most powerful thing you can do on this Earth.”

WGCH – Willow “The 1st night we started to write out The Dauntless Chronicles, I stayed up for 52 hours and we just power wrote five chapters, we had a notes document, it was awesome!”

Willow: “I ended up writing chapter 40 while we were on 6.”

Pamela to W&A – “What did you two get from this collaboration?” Willow: “We both got to open our imaginations with this and really express the infinite boundaries.” Anthony: “Many positive emotions.”

Quotes from Interviews

WGCH Continued...

Pamela to Willow – “What does writing mean to you? Willow, is it just a language of communication that connects you with others or is this something that touches you deeply in your soul?” Willow: “It’s both. I really love writing. Ever since I was little, I’ve just enjoyed writing stories, I want to get my ideas out, I have fun expressing myself

through a character’s words and how they see the world. It’s wonderful and other people get to enjoy that which I think that’s fantastic.”

Pamela: “I understand there are also dragons?” Willow: “Oh, yes! They’re like a sacred animal to the Velusan race and their planet. They’re feared, they’re powerful, they’re beautiful and big silvery/white; they have that icy look to them. And we just started playing around with the idea like how cool would it be to also implement an alien dragon? Like how awesome is that!” Pamela: “I know, it’s fantastic!”

Anthony: “Everybody likes dragons. Who doesn’t like dragons!” Pamela: “Of course!”

Pamela: “We’ve got to get to know you guys! You guys are pistols! I love it!”

Pamela: “I love it! This whole discovery is wonderful! You guys are infectious with your enthusiasm!”

Ann: “Do you have aspirations that it could be a screenplay?” (Willow) “Absolutely!!” (Anthony) “Oh, heck, yeah! There’s so much story...” (Willow) “...each chapter could be an episode for a TV show.”

Snippets of Some Reviews

Mark MacGregor, Newscast Director, CBS Channel 31, WMBD-TV, Illinois

This heartfelt adventure/ science fiction/friendship story told from the eyes of every major character, keeps the action rolling and the imagination fueled. The reader feels emotionally attached to, and invested in each character. When is the movie coming out!?

Bryan Post - Founder, The Post Institute; Top-selling Author & Coauthor of 13 books

The Dauntless Chronicles - what an amazing feat of creativity and brilliant storytelling. This work would make both Joseph Campbell and George Lucas proud.

Emilyn Mohebbi – TV Producer, NBC Channel 7, San Diego, California

One of my favorite aspects of this novel is the way it is formatted. Each chapter is told from the perspective of a different character, which leads to curiosity as you read from various characters' points of view. This unique story will keep you intrigued the entire time!

Bob Small – Radio Station Manager, WGCH 1490AM

A well-crafted, fast-paced adventure with a strong group of main characters that hook you in right away.

Snippets of Some Reviews

Dr. Jeffrey Bernstein – Top-selling Author of 6 books including Why Can't You Read My Mind?

Aptly titled, readers will have almost no time to fasten their seatbelts before being blasted off into gripping tales of out-of-this-world adventure. Creatively developed characters transcend the galaxies as they show indefatigable courage and resourcefulness when facing never-ending perilous challenges. It is so well-written, brilliantly creative, outright amazing and it truly is something "out of this world!"

Annette Bosley-Boyce, M.A. – Dean, Professional & Graduate Studies, Albertus Magnus College

If you ever wanted to see the cosmos in 2145, then get ready! Wren and Olmo bring you to a future where the infinite power of love, friendship, and kindness reign over the threat of war, fear, and evil.

Trish Pena, Frm. News Anchor & Reporter, WTVW-TV Channel 7 News

A thrilling journey filled with suspense and heartfelt love for each character. I honestly had to remind myself that this book was written by two 14-year-olds. They are truly talented.

Snippets of Some Reviews

Michele Sfakianos, R.N. – Award-winning Author of 11 books including The 4-1-1 Series

Saving planets, space travel, ships, and trains – it has it all! A very compelling story full of action, suspense, and riveting plot twists!

Shelli Dankoff, Frm. News Anchor, CBS Channel 31, WMBD-TV, Illinois

Engaging, exciting, and intriguing. The attention to detail is fascinating - everything from the amazing descriptions of the spaceships and Area 51 to the exploration of young love. Perhaps best of all, it didn't end predictably, with a bow neatly wrapped around it. I kept saying to myself 'this was written by two teenagers?!'

Pat Montgomery – Award-winning Author, Now You Know What I Know; Grandma of 15

Excellent story with intrigue, action, romance and everything else you need for a great tale. And if you think that you can guess the ending...you would be wrong! Remarkable book!
